Entrust People

Entrust People are currently recruiting on behalf of one of their busy and expanding clients in Livingston.

This is a great opportunity for a Production Technician to join one of the largest clinical laboratory providers in the world. The business has over 50,000 employees, while operating in over 100 countries across the globe.

The successful Production Technician will be directly involved in working within a lab environment, the role will include sorting incoming specimens for testing, storage or onward shipping. Inputting data onto a computer system is also a large part of this role, so we are looking for people with strong computer skills.

Production Technician Requirements:

Production/warehouse experience

Ability to follow SOPs (standardised operational procedures)

Flexibility to work shifts

Good practical skills

We currently have several outstanding openings with an immediate start, these contracts could lead to permanent employment.
