

Polymer Scientist

Location – Livingston

This is an opportunity to work with an exciting, successful, growing medical device organisation and an opportunity has arisen for an experienced Research and Development Scientist to join their team based in Livingston.

As a Research and Development Scientist you will be responsible for support of process and improvement along with new product development.

The business is going through substantial growth and looking for a polymer subject matter expert to join the team.

If you feel that you are looking for your next challenge and would like the opportunity to be involved in the continued development of the company, please get in contact today.

Key Aspects of the Role:

- Polymer Chemistry subject matter expert
- Support and provide knowledge for process improvement activities
- Manage the design history files for new product development
- Liaise with external partners to secure grant funding for Research and Development projects

About You:

- An experienced polymer scientist with basic working knowledge of Rheology
- Experience of organic chemistry
- Strong analytical and data manipulation skills
- Demonstrated ability to drive scientific projects effectively, ensuring timelines and objectives are achieved
- Ability to work as part of a team communicating across all levels of the business
- Educated to a PhD

Further Details

Our client is offering a competitive salary in a great working environment therefore if you are looking to further develop your career with a thriving and growing company, this could be the role for you.
