

Entrust Resource Solutions

Appointment Reflects Entrust Resource Solutions' Growth Aim

Press Release
23 June 2020

Executive search consultancy, Horton International UK, has announced the appointment of scientific recruitment heavyweight, Dafydd Wright, as Managing Partner. The move comes as the company continues to implement the ambitious growth plans of parent group, Entrust Resource Solutions.

Beginning his career as a research scientist for the biotechnology and brewing industries, Dafydd brings more than 18 years' experience of international life sciences resourcing to the role, including 12 years in both consultant and management roles for a global, executive-level interim management service.

Oxford-based Horton International UK was acquired by Dundee-headquartered Entrust Resource Solutions in 2018. Recently named within Hunt Scanlon Media's Top 50 Healthcare and Life Sciences Executive Search Companies, Horton International provides a global, retained executive search and talent strategy service, focusing upon senior management and board level appointments.

Commenting on his appointment, Dafydd said: "I am thrilled to be joining an energetic team of dedicated professionals, who clearly share my passion to support organisations in hiring the very best talent, in order to bring scientific benefits to both the patient and consumer.

"Despite these challenging times, Horton International's portfolio grows as we continue to identify highly-qualified candidates for specific senior-level positions. Our retained search service is justly renowned for the quality and performance of our candidates and this is testament to the drive, commitment and quality of our hiring and talent advisory teams."

Ryan Watson, Managing Director of Entrust Resource Solutions added: "We are an ambitious company, with a bullish growth strategy in place and we are excited about the experience and fresh perspective Dafydd will bring to his role.

"To attract as high calibre an individual as Dafydd is hugely encouraging; not only demonstrating the strong reputation Horton International UK has already built, but also highlighting the demonstrable growth potential of the company."
