

Clinical Project Manager (CPM)

Location:	Stirling (FK9 4NF) (Office Based)
Salary:	£COMPETITIVE
Job type:	Permanent
Company:	The CLINICAL TRIAL Company™ Limited

An exciting opportunity has arisen for an experienced Clinical Project Manager (CPM) to join The CLINICAL TRIAL Company™ Limited (TCTC), a world-leading full-service clinical research organisation (CRO).

TCTC has offices in the UK, Canada, Australia, Singapore and the USA. We operate throughout Europe, North America, South America, India, China, Africa and Australasia. Our expanding company provides clinical trial services and support to the pharmaceutical and medical device sector.

We are seeking an experienced Clinical Project Manager to join The CLINICAL TRIAL Company™ Limited. The successful candidate will project manage sponsor clinical trials to applicable regulatory guidelines and Good Clinical Practice (ICH GCP) standards, within agreed timelines and stated budgets. This position will report to the Head of Project Management based in our UK Headquarters in Knutsford, Cheshire.

Key Responsibilities:

- Ensure that all TCTC clinical studies conducted are in accordance with Good Clinical Practice guidelines (GCP) and are completed on time and within the stated budget
- Generate clinical project plans and oversee adherence to ensure business objectives and key deliverables are met
- Contribute to the clinical trial design and the identification of potential study sites where necessary
- Oversee and manage the development and approval of clinical trial documentation
- Oversee and manage timely clinical trial submissions to ethics authority and assist where possible in regulatory applications in order to proceed with clinical studies
- Management of any specialist vendors contracted by TCTC in relation to day to day operations of assigned clinical trials and to ensure that study timelines and deliverables are being achieved as contracted
- Develop ongoing relationships and define project milestones as the primary contact with the sponsor
- Ongoing risk assessment and management
- Ongoing evaluation of project strengths, weaknesses and potential areas for improvement
- Build effective relationships internally at TCTC and externally with the Sponsor/Contractors

Description:

The role will require you to be educated to degree level or equivalent in a scientific field with proven clinical project management experience within a CRO or pharmaceutical company; a full driving licence together with a willingness to travel.

Clinical Project Manager (CPM)

Key skills required:

- Excellent project management and personnel management skills
- Fluent written and oral English language including familiarity with medical terminology
- Professional interpersonal and communication skills
- Ability to work with minimum supervision and to prioritise tasks
- A flexible and adaptable attitude
- Ability to problem solve
- Numeracy and good attention to detail
- Excellent time management skills
- Self-motivation and enthusiasm

TCTC offers prospective candidates a truly exciting opportunity to join a growing and dynamic organisation, developing your career as the company grows. TCTC's employees are vital to our success and so we are looking for candidates to join the company and to stay and grow with us. In return you will be rewarded with the opportunity to work on clinical trials of real scientific merit and with excellent opportunities for professional and personal development.

Before you apply for this position it is vital that you are in possession of an EU or UK passport or relevant visa to work without restrictions in the UK.

KEY WORDS: Clinical Project Management; CPM; Clinical Research; Good Clinical Practice, ICH GCP
