

Dundee Cell Products Ltd. REBRANDS as DC BIOSCIENCES Ltd.

WHY THE REBRAND?

Dundee Cell Products Ltd. was founded in 2006 as a spin-out of the internationally renowned University of Dundee by Professor Angus Lamond (Lamond Lab).

Today, DC Biosciences Ltd. is a very different business from its early roots as a supplier of reagents. We are internationally recognised as a leading player in proteomics, molecular biology and biochemistry, working with global CROs and pharmaceutical companies.

WHAT DOES THIS MEAN?

- Our capabilities and services are highlighted by our exciting new website (www.dcbiosciences.com)
- A reflection that we are a global company
- We have expanded beyond a supplier of reagents and are now a provider of cutting edge services
- DC Biosciences Ltd. engages with leading businesses and academics to develop and deliver pioneering science and solutions
