PRESS RELEASE

For immediate release

Entrust Resource Solutions to grow their team

With two acquisitions complete this year, Entrust Resource Solutions are now creating new jobs across the UK by adding a specialist Resourcing Team to their business.

Entrust Resource Solutions recently announced an ambitious growth and acquisition strategy. This started with the addition of two resourcing consultancies to their portfolio, with Horton International (UK) and SCI Search and Selection joining Entrust People. To keep up with their rate of growth and better support their team, the business is now creating a new Resourcing Team.

The Resourcing Team will primarily support the Consultants within the Delivery Team by searching for suitable candidates to add to their substantial network. This new team will free up our consultants' time, so they can focus their time and attention to the needs of their clients.

These roles are a great opportunity for life sciences students and graduates to gain a deeper understanding of the industry, hiring practices and their career options. The roles are also a good fit for those looking to start a career in recruitment. The team will be located across all three of our offices, with opportunities available now in Dundee, Thame and Northwich.

Robyn Jerdan, a Resourcer with Entrust People for 2.5 years while studying, says:

“This job has not only helped to fund my studies, but also better prepared me for my future career. Working with a specialist life science resourcing consultancy has given me a new depth of understanding into the world of life sciences. I am already working with companies I could work for in the future, as well as receiving first-hand knowledge of the diverse career paths scientists are taking.”

Entrust Resource Solutions

With the acquisition strategy now complete, Entrust Resource Solutions have created a brand to join the three companies and better represent their culture and vision. A new website is also now available, here: www.entrustresourcesolutions.com.

ENDS

Entrust Resource Solutions Founding Directors' Ryan Watson and Austin Clark welcome the opportunity to discuss their growth strategy. Please contact Lisa Tait, Marketing Manager, on 01382 933086 or lisa@entrustpeople.co.uk to set up an interview.

Notes to editor:

Entrust Resource Solutions

Entrust Resource Solutions is a group of search and resourcing consultancies offering an unrivalled solution to talent attraction. Specialising within the life sciences, healthcare and technology industries, we offer a "one stop shop" for hiring needs. Our expert team can provide solutions for a full range of roles, from Bench to Board, working on contingent, interim and executive search assignments.

Entrust People

Entrust People are a specialist Life Science search and resourcing consultancy based in Dundee, Scotland. We pride ourselves on the approach we take with both clients and candidates. This approach is consultative, service led and allows us to support our clients' business objectives and our candidates' career paths. We understand that the landscape is changing around talent attraction and career development – but what hasn't changed is that people are the most important aspect of any business.
