

Onorach Introduce Clinical Trial Supplies

Clinical Trial Supplies are now available from Onorach™.

Whether it is the preparation and distribution of non-commercial clinical trial drugs (with or without placebo or third party (outsourced) products) or the management of the entire supply process of a clinical trial, Onorach™ can assist.

Onorach™ can offer clinical trial supply services covering over-encapsulation, labelling, blinding and patient pack preparation. Onorach™ can also manage domestic and international distribution. All clinical supplies are distributed using specialist courier companies with specific expertise in the transportation of pharmaceuticals.

Where appropriate we ensure temperature control and monitoring of each package from pick-up to arrival at the client's site.

Stephen Leiper, CEO of Onorach™ said, *"This expansion is part of our commitment to provide customers with the fullest range of high quality services. This new clinical trial supply offering dovetails and complements our existing services and provides another step towards an end-to-end solution for our clients"*.

Call us now to find out how this service can help you achieve your clinical supply chain goals.
